gCon

YOUR COMPLETE SOLUTION FOR
HYBRID AND VIRTUAL CONGRESSES

Benefits of the solution

➔ **For active participants (speakers and chairs)**
  - ➔ Presenting his lecture even in absentia
  - ➔ Possibility to moderate the whole section remotely

➔ **For passive participants (audience only)**
  - ➔ Remote viewing of selected presentations
  - ➔ Allows interaction from the hall as in a normal action
  - ➔ Waiver of participation fee in the event of a sudden obstacle to participation

➔ **For organizers**
  - ➔ Allowing equivalent participation to all who cannot come in person
  - ➔ It solves the problem with the necessity to return the participation fees
  - ➔ Possibility to organize a completely virtual congress without renting fee
  - ➔ Compliance with the standard format of the event (sections, lectures, breaks)

Hybrid congress

Definitions and needs

➜ Congress is held as usual
   ➜ All halls are equipped with the necessary technology
   ➜ Some of the participants will come personally and watch the lectures in the halls
   ➜ Some speakers and chairs cannot come
   ➜ Some listeners cannot come

➜ The halls need to be equipped with extra equipment
   ➜ Transmission device for presentation on the Internet (streaming technology)
   ➜ The control server with the congress system gCon needs to be connected to the fast and stable Internet in the preview room
   ➜ In order to communicate with the speaker, it is only necessary to use different microphone setup

Virtual congress

Definitions and needs

➔ Congress takes place only virtually
  ➔ Does not exist or can not be used a conference room for participants
  ➔ No participants, speakers or chairs will arrive
  ➔ Congress date and the program is already set and assembled
  ➔ Here is no accompanying program and refreshments

➔ Necessary technical equipment
  ➔ This kind of congress must also be technically organized
  ➔ A server with a congress system gCon and technology for each virtual hall is installed in our or client's space
  ➔ Session management notebook and streaming device for transmitting presentations to the internet
  ➔ For each hall, it is necessary to have one technician to ensure smooth running of the whole congress day
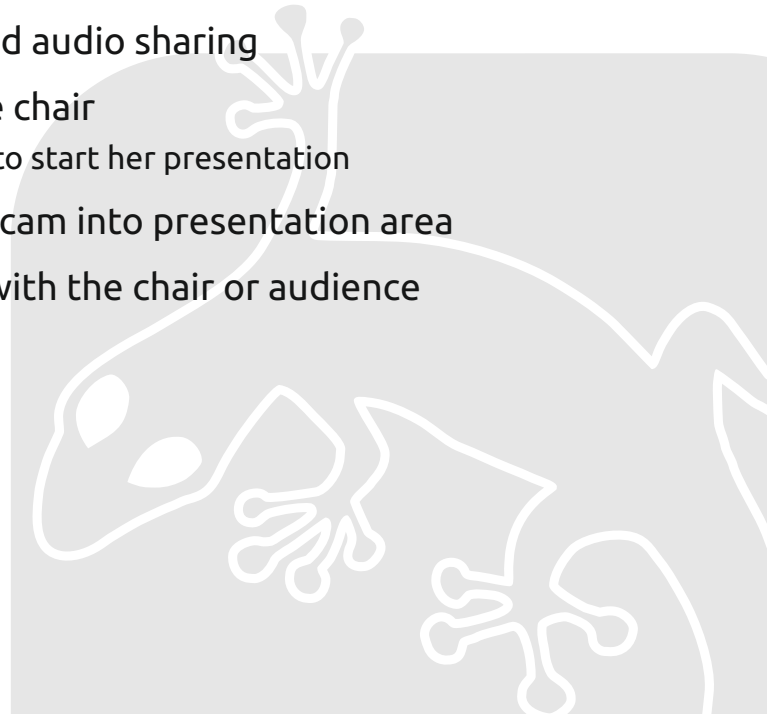

Virtual speaker preview room

➔ It provides fully automated test speaker connection with virtual hall
  ➔ This option is suitable for more technically skillful speakers
  ➔ No need to communicate with the technician in the virtual preview room
  ➔ Quick and independent of the opening hours of the preview room

➔ Possibility to use on-line connection with a technician in a virtual preview room
  ➔ Simple communication via chat
  ➔ Easy voice connection
  ➔ Recording of connection and their later review

➔ After visiting the virtual preview room, the participant is assured of successful connection during the presentation or chairmanship

Remote speaker

➔   Easy and intuitive interface for video and audio sharing

➔   Start sharing presentation online by the chair

    ➔   The speaker only waits for an invitation to start her presentation

➔   Possibility to integrate image from webcam into presentation area

➔   Two-way communication from the hall with the chair or audience

Remote chair

➜ Simple audio sharing interface

➜ It mediates participation in her session

➜ Possible combination of present and remote chairs

➜ Watching a preview of an ongoing presentation online

➜ Ability to comment on current events in the session

## Remote viewer

➔ Well-arranged list of halls with previews with current events

➔ Watching selected presentations in full screen

➔ Adding additional information to the stream

  ➔ Speaker's name and photo

  ➔ The entire abstract of the presentation

  ➔ Names and photos of chairs

➔ Full-featured interaction with the entire hall

  ➔ Asking questions

  ➔ Voting
