

YOUR MOBILE APPLICATION  
FOR CONFERENCES AND CONGRESSES

# The application offers users the following

- Clear modern design with simple intuitive control
- Off-line architecture that makes the application high speed even for large events with very extensive agendas
- Detailed professional agenda divided into individual days, auditoriums and lecture sections
- Clear graphical agenda overview
- Personal agenda with notifications of upcoming lectures
- Overview of posters with the possibility of division into topics
- Simple rating of specific lectures and posters
- Interactive answer sheets and surveys
- Putting questions to speakers and voting
- Easy communication with the organizers and access to news and notifications

# Benefits for the organizer of the event

- Useful especially for congresses and conferences of all sizes
- Complete integration with the gCon conference system
- Single preparation of data for the entire event - the applications and the conference system utilize the same database
- Immediate updating of data in the mobile application of users responding to changes performed by the organizer during the event
- Linking between individual modules of the application and the system, for example, the entered news is displayed in the mobile application and at the same time on the screens in the event venue
- Complete management of all data by means of a clear admin interface
- Possibility of processing in many language versions
